Hosting SSH on port 2222

Open CentOs

find current sshd status like it runs on which port

```
1    sudo systemctl status sshd
```

By default it runs on port 22 now change it to 2222

```
1    sudo nano /etc/ssh/sshd_config
```

from:---

```
1    #Port 22
2
3    #AddressFamily any
4
5    #ListenAddress 0.0.0.0
6
7    #ListenAddress ::
```

to:---

```
1    Port 2222
2
3    #AddressFamily any
4
5    ListenAddress 0.0.0.0
6
7    #ListenAddress ::
```

Then ------------

```
1    sudo systemctl restart sshd
2    sudo systemctl status sshd
```

Then connect with kali----------

```
1    ssh -p 2222 ranger@192.168.91.130
```
